NEW UPGRADES FOR THE CANTEEN

The Canteen has upgraded its video surveillance system to include additional cameras which are able to see in darkness and are in color. We have broadened the view to include all sides of the building and parking lots to offer a better degree of security for our Members their Guests and their vehicles.

The Canteen hopes to have installed weather protection awnings over their main Canteen entrance and the side parking lot entrance by the beginning of the Fall weather.

These awnings are illuminated at night and offer a higher degree of protection from the weather on rainy and snowy evenings, and they help advertise and beautify the Post.

The Canteen recently upgraded the efficiency of its Beer Tap cooling system. This is an ongoing effort to improve the efficiency of the Canteen and reduce costs. Your Draft Beers will stay colder and will pour better.
